

Follow-up to Enrique's February 18, 2021, email (below)

Laura,

We appreciate your patience as we work to schedule our meeting with the state. We have a meeting scheduled with our state partners on Monday, March 8.

I understand the Navy wants to quickly move forward with scheduling a meeting with the HPNS Federal Facility Agreement (FFA) signatories and DTSC. From our experience, there are many calendars involved to schedule these meetings. Below are some initial times my staff scoped along with DTSC:

- Early morning of Friday, March 19
- Morning of Wednesday, March 24
- Early morning of Friday, March 26
- Early afternoon of Monday, March 29

To schedule the meeting, we recommend the Navy work with staff the following staff:

- DTSC's Nina Bacey ([[HYPERLINK "mailto:Juanita.Bacey@dtsc.ca.gov"](mailto:Juanita.Bacey@dtsc.ca.gov)])
- CDPH's Heidi Holt ([[HYPERLINK "mailto:Heidi.Holt@cdph.ca.gov"](mailto:Heidi.Holt@cdph.ca.gov)])
- EPA's Maria Ginelsa ([[HYPERLINK "mailto:Ginelsa.Maria@epa.gov"](mailto:Ginelsa.Maria@epa.gov)])

We look forward to working with you to achieve a protective radiological remedy for buildings.

Subject: Hunters Point Buildings Radiological Rework

Importance: High

Good Evening Laura,

Thank you for your latest email. We agree it is imperative that we make progress on the building radiological rework. EPA's current position is to confirm the existing radiological remediation goals for the onsite buildings will be protective of future residents. Since the Navy's January submittals did not provide information that EPA believes moves the conversation sufficiently forward, we pivoted to confer with our state regulatory partners, including our colleagues at CDPH.

From the attachment in your response, it seems the Navy also has important questions for CDPH regarding its radiological dust wipes work at Parcel A. Coordinating with CDPH has proven to be challenging because of their involvement in the ongoing San Francisco Board of Supervisors meetings

regarding the Treasure Island site. We anticipate this HPNS meeting between EPA and the state occurring in the first week in March. After confirming a meeting date with the state, we will quickly reach out to you to move forward with scheduling a meeting with the HPNS Federal Facility Agreement (FFA) signatories.

I expect we can find a workable approach that is technically sound and protective of human health.

Best regards,

Enrique
